

# Artcraft Awning Co.

A Division of Engineered Textile Products, Inc.

## *Curtain Call:*

One of the many advantages of living on the Gulf Coast is the weather, so why not enjoy your outdoor living space with Artcraft Awnings outdoor curtains. Our outdoor curtains have many uses and will enhance your outdoor living space by shielding areas from the elements.

Recently, Artcraft Awning installed a large valance style awning and three side rolling curtains to form alcoves in the outdoor living space of Mrs. Rhea Mosteller's home. Mrs. Mosteller chose to install the rolling curtains "to enhance the area, provide relief from the sun, and give the area a finished look."

So far, Mrs. Mosteller has enjoyed the patio which surrounds the pool area. She plans on using it most during the spring and summer months for entertaining with friends and family, including her 9 grandchildren.

Other uses for these curtains include protection from the wind. Artcraft Awning recently installed side rolling curtains on the North and South sides of the Nipper's outdoor kitchen. The side rolling curtains were installed in order to shield the area from the North wind which prevented the family from using their outdoor kitchen during colder months.

Through the use of Artcraft Awning's curtains, the Nippers have been able to maximize the use of their outdoor kitchen. Our curtains are not only an attractive addition to your patio, pool area, or any other outdoor space, but they also provide a functional use in protecting areas from the elements.

## Metal AWAY:

From retail locations to residential use, metal awnings are used to add a distinct finishing touch to any structure. Recently, metal awnings have regained popularity because of the distinct look and feel they give to a building. Providing an easy face-lift to any structure, metal awnings may be used as a simple way to enhance your location's curb appeal.

One of Artcraft Awnings initial projects with metal awnings was to add accents to a restaurant chain's location. By installing a red standing seam metal awning, we were able to easily transform a dull stucco building into an inviting restaurant storefront.

We have even seen metal awnings put to residential use. By offering metal awnings, Artcraft Awning is committed to offering our customers many options when it comes to adding finishing touches to their locations. From protection for a door or window to covering a walkway or patio, metal awnings are another alternative we offer in addition to traditional fabric awnings.

## Downtown Charm:

Recently, Artcraft Awning installed a marquee entrance canopy at Mobile Senior Housing's Downtown Renaissance development. A senior housing residence owned by the Mobile Housing Board, Downtown Renaissance came to Artcraft Awning seeking a covered canopy walkway for residents and guests. Prior to the canopy, the entrance had no protection from the curb to the entrance, an approximate 21' span.
